ABSTRACT

War Department, United States Army (USA)
Army Research Branch, Information and
Education Division. The American Soldier
Series: "Special Services' Study: Movies,
Stage Shows, Singing" (S-63A; July 1943).
[machine-readable data file]/ Collected by
the Army Research Branch: the Roper Center
[producer] 1977; the National Archives and
Records Administration (NARA) [distributor]

PROVENANCE: One in a series of empirical studies converted to
tape from punch cards by the Roper Center in 1977. The
data and documentation are copies, created from data
collected by the Army Research Branch between 1942-
1955. Due to factors such as age and military
reorganizations, the series is no longer complete.

TYPE OF FILE: Microdata with numeric codes. Units of observation
are white enlisted men.

UNIVERSE DESCRIPTION: White enlisted men in the US Army.

GEOGRAPHIC COVERAGE: Continental United States.

SUBJECT MATTER DESCRIPTION: A study to gather information on
men's satisfaction with entertainment provided for them
at Army camps and their attitude toward the importance
of singing in the Army. The men were asked their
opinions about the film "The War" and other films,
movies, stage and radio shows and hit kits. The study
also elicits information on men's branch preference.

A cross-section of white enlisted men was drawn from 11
ASF, AGF and AAF installations throughout the US. S-63
is the first sub-sample of the Special Services Study
cross-section survey. S-63 A and S-63 B deal with
entertainment items and may be combined to create a
single sub-sample.

TECHNICAL DESCRIPTION:

FILE STRUCTURE: non-hierarchical, fixed length
FILE SIZE: 1113 total cases (see agency abstract) with
three card image records per case.

SORT SEQUENCE: arranged by card number, thereunder by survey number, thereunder by ballot number (last is a Roper Center designation).

RELATED REFERENCE MATERIALS: See NARA general documentation for the American Soldier Series.

RELATED PUBLICATIONS: See list of related publications and agency documentation described in the NARA general documentation folder for the American Soldier Series.

SPECIAL SERVICES' STUDY
(Movies, Stage Shows, Singing)
S-63A

1. PURPOSE

- (a) To gather information on men's satisfaction with movies and stage shows presented to them at Army camps and their attitude toward the importance of singing in the Army.
- (b) In addition, includes information on soldier's branch preference.

2. DATE OF ADMINISTRATION

July, 1943

3. SAMPLE*

A cross section of 1,113 white enlisted men from eleven ASF, AGF and AAF installations throughout Continental United States. S-63 is comprised of one sub-sample (1st sub-sample cross section).

4. ANALYSIS MATERIALS AVAILABLE

- (a) Field officers' notes (see General Folder)
- (b) Questionnaires (1,113)
- (c) One set of IBM cards labeled Special Services' Study - S-63 A, containing:
 - (1) Camp and outfit identification (Cols 1-6).
 - (2) Questions 1-88 (Cols. 7-80) (Except Qs. 38, 39, 42, 44, 53, 56, 66, 75, and 87 which were not coded).

6. REPORTS

- WST #1 The Married Soldier
- B-58 Attitudes of Enlisted Men Toward Singing in the Army
- B-70 Preferences of Enlisted men for Branch of Service
- B-71 Preliminary Report on Movie Attendance Among Enlisted Men
- B-79 Movie-Going Habits and Attitudes of Soldiers Toward Movies and the Theaters they Attend
- B-83 Attitudes and Opinions of Enlisted Men Toward Stage Shows

- B-85 Compendium of Soldiers' Attitudes Toward Music and Singing
- Note: See especially S-63 B and also S-63 C, D, E, F, G, and S-64.

7. SPECIAL NOTE

S-63 A was part of an omnibus study. It was administered in the field by interleaving with four other questionnaires. The cases in S-63 A by themselves constitute a cross section of the Army (first cross section). However, in order to make a more detailed analysis of some of the questions asked in S-63 A, the same questions were also asked in S-63 B. S-63 B has 2,044 cases and is made up of two separate cross section sub-samples (2nd & 3rd cross section samples.) Therefore, for purposes of more detailed analysis S-63 A & B can be thrown together and together they represent an over-all cross section of the Army (3,157 cases). Certain other questions, calling for still greater refinement in analysis, are carried in every questionnaire in the omnibus study.

Note: See Introduction to S-63 and S-64.

VALIDATION NOTES

(SPECIAL SERVICES' STUDY: MOVIES, STAGE SHOWS, SINGING)

AMS63A.CLEAN (AMS063A.CDBK)

There are no codes for data for questions 38, 39, 42, 44, 56, 66, 75, 87, 89. There are no codes for open-response questions. The record in the dump has a missing value code for the camp identification number (columns 42-43 of the third card image record). Frequencies should be obtained to determine if all cases have missing value codes for camp ID.

Otherwise the data and documentation appear to be all right with hand validation.

8. SPECIAL NOTE

S-63 D was part of an omnibus study. It was administered in the field by interleaving with 4 other questionnaires. The cases in

S-63D constitute a cross section of the Army. However, in order to make a more detailed analysis of some of the questions asked in S-63D, the same questions were asked in S-63C and other questionnaires. Therefore, for purposes of more detailed analysis S-63C and S-63D can be thrown together to give a total of 6,303 cases and the two studies together also represent a cross section of the Army, (Both S-63C and S-63D are made up of three sub-samples and if either one is combined with S-63A, B, E or S-64, the resulting sample will have an over weighting of certain of the sub-samples).

Certain other questions, calling for still greater refinement in analysis, are carried in every questionnaire in the omnibus.

Note: See Introduction to S-63 and S-64.
