ABSTRACT

War Department, United States Army (USA)
Army Research Branch, Information and
Education Division. The American Soldier
Series: "Officers' Orientation Study" (S-85;
December 1943). [machine-readable data
file]/ Collected by the Army Research
Branch: the Roper Center [producer] 1977; the
National Archives and Records Administration
(NARA) [distributor]

PROVENANCE: One in a series of empirical studies converted to
tape from punch cards by the Roper Center in 1977. The
data and documentation are copies, created from data
collected by the Army Research Branch between 1942-
1955. Due to factors such as age and military
reorganizations, the records are no longer complete.

TYPE OF FILE: Microdata with numeric codes. Units of observation
are white company grade line and staff officers.

UNIVERSE DESCRIPTION: Some officers in the Army (this is not a
representative cross-section sample of all Army
officers).

GEOGRAPHIC COVERAGE: ASF, AGF, and AAF installations in the
continental US.

SUBJECT MATTER DESCRIPTION: A study to determine the need for
orientation at the officer level. Specific areas of
inquiry include: utilization of skills, officers'
attitudes toward training and orientation, importance
of orientation items for men, importance of orientation
items in officers' training, attitudes toward some
orientation practices, officers' own orientation and
degree of being well informed.

Many scales and scores were developed for the survey
including: belief in mission, favorableness toward
orientation and training, belief in Army fairness and
interest in troops, zeal, attitude toward discipline,
job satisfaction, personal adjustment, pride in outfit,
attitude toward superior officers, opinion of postwar
domestic and international situations, knowledge of
current events, and Army information test score.
The survey includes a sample of white company grade

line and staff officers from regular units in 5 ASF, AGF, and 3 AAF installations in the US. The sample also includes UTC and RTC officers from Camp Crowder. A sub-sample which is a cross-section of 3 Divisions (the 66th, 75th, and 77th Infantry Divisions) was derived from the total sample. The machine-readable documentation provides codes to distinguish between the sample and sub-sample.

TECHNICAL DESCRIPTION:

FILE STRUCTURE: non-hierarchical, fixed length.

FILE SIZE: 1048 total cases with 2 card image records per case (see agency abstract).

SORT SEQUENCE: arranged by card number, thereunder by survey number, thereunder by ballot number (last is a Roper Center designation).

VALIDATION NOTES
(OFFICER'S ORIENTATION STUDY)

AMS85.CLEAN (AMS0085.CDBK)

The raw data for the study is available in a single dataset (AMS85.CLEAN), and the documentation is available in another dataset (AMS0085.CDBK). Marginal distributions are available in the documentation dataset.

The documentation dataset does not have codes for any of the scores at the end of the survey, nor for the camp and outfit identification variables. Also, there are no codes or data for open response questions. The rest of the documentation and data look all right with hand validation.

Frequencies should be obtained to confirm the number of total cases. Consult original documentation in the Military Reference Division (NNRM) for additional information.
